THE FINAL FRONTIER

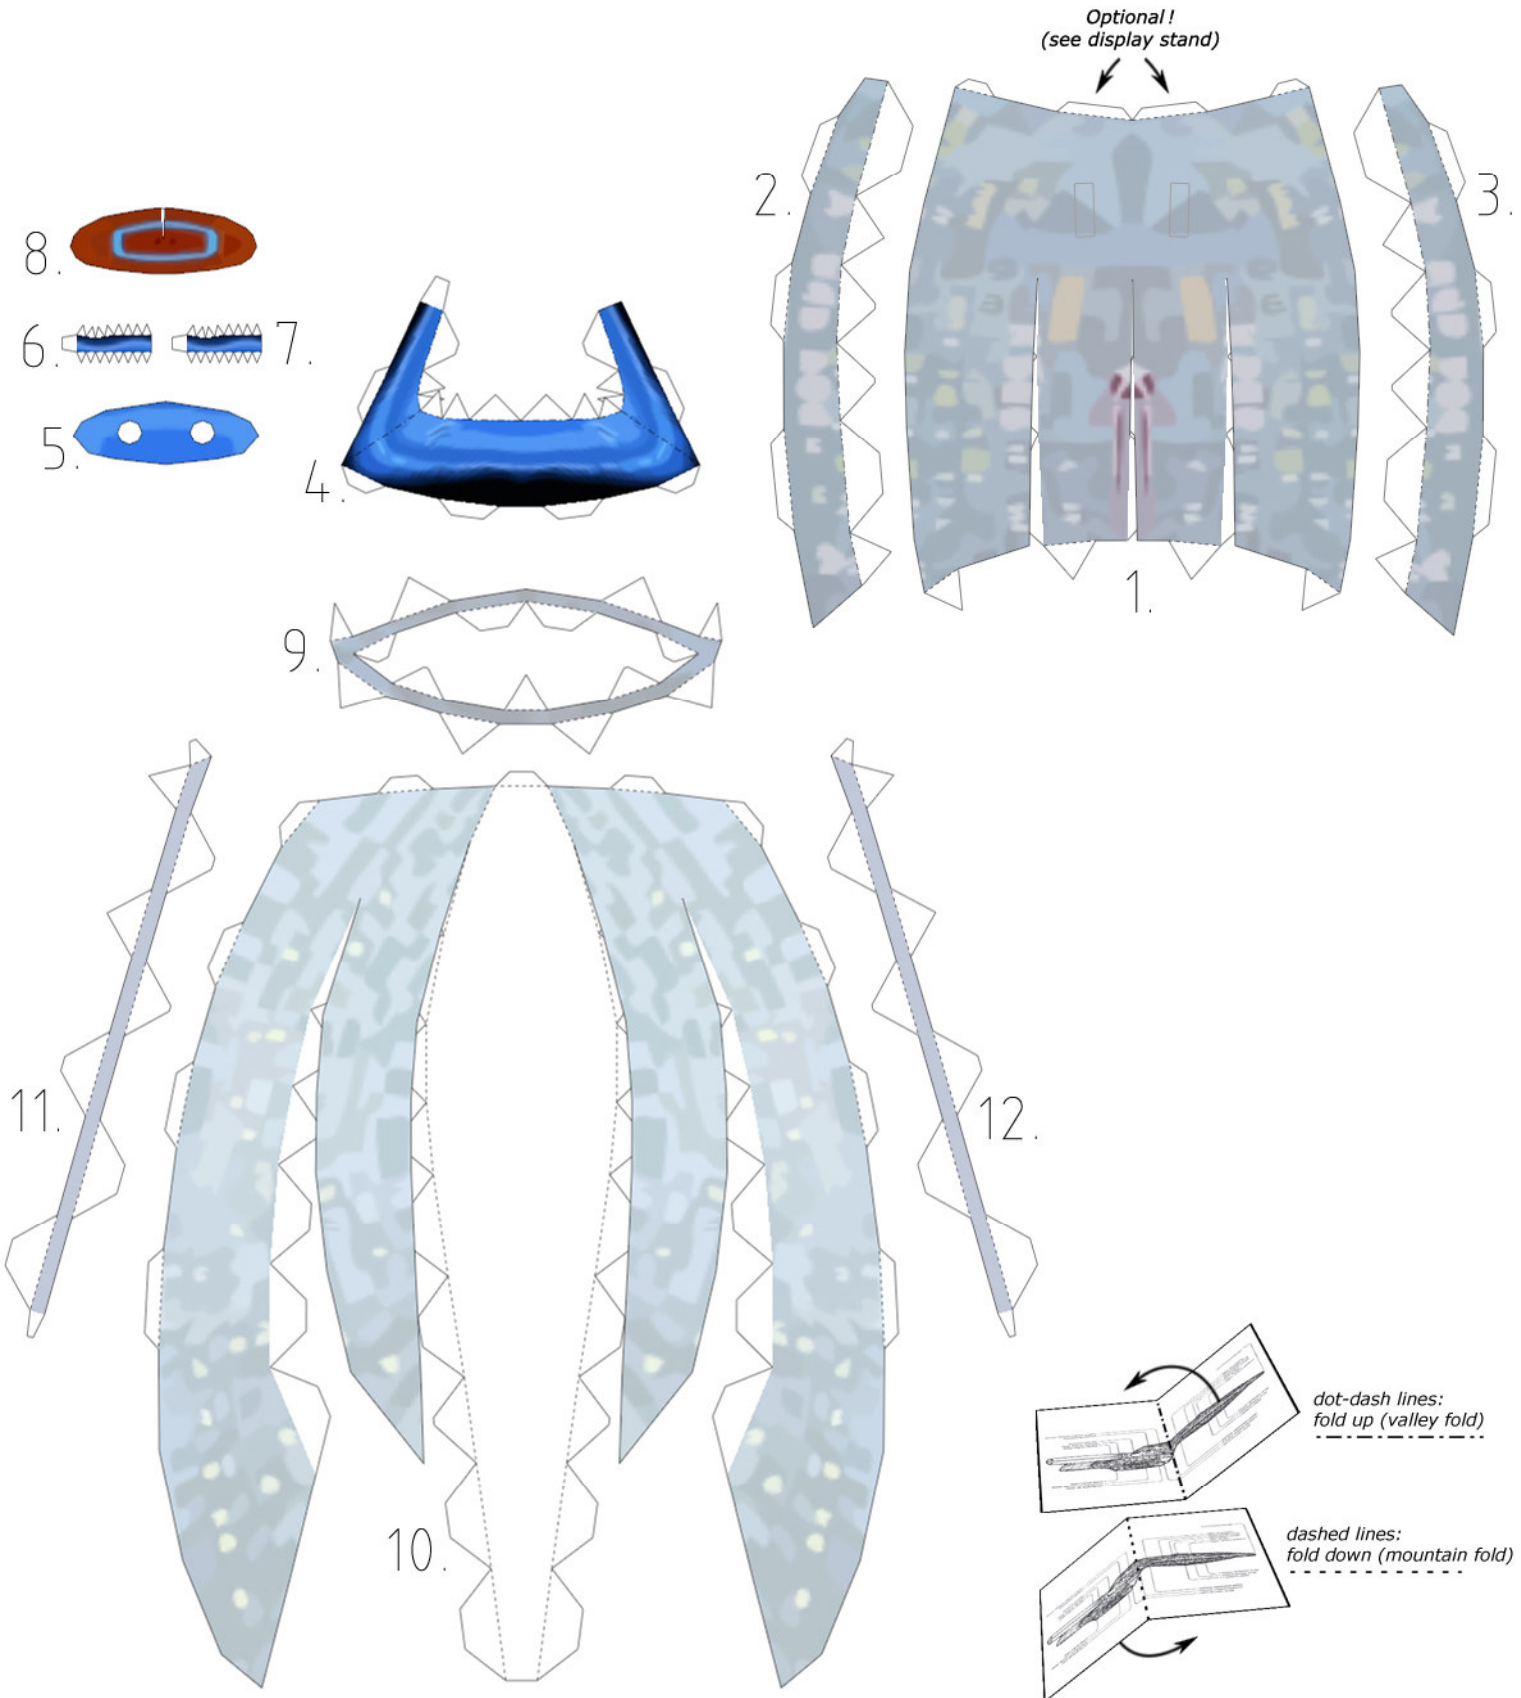

U.S.S. Enterprise NCC-1701-D papercraft model by Ninjatoes

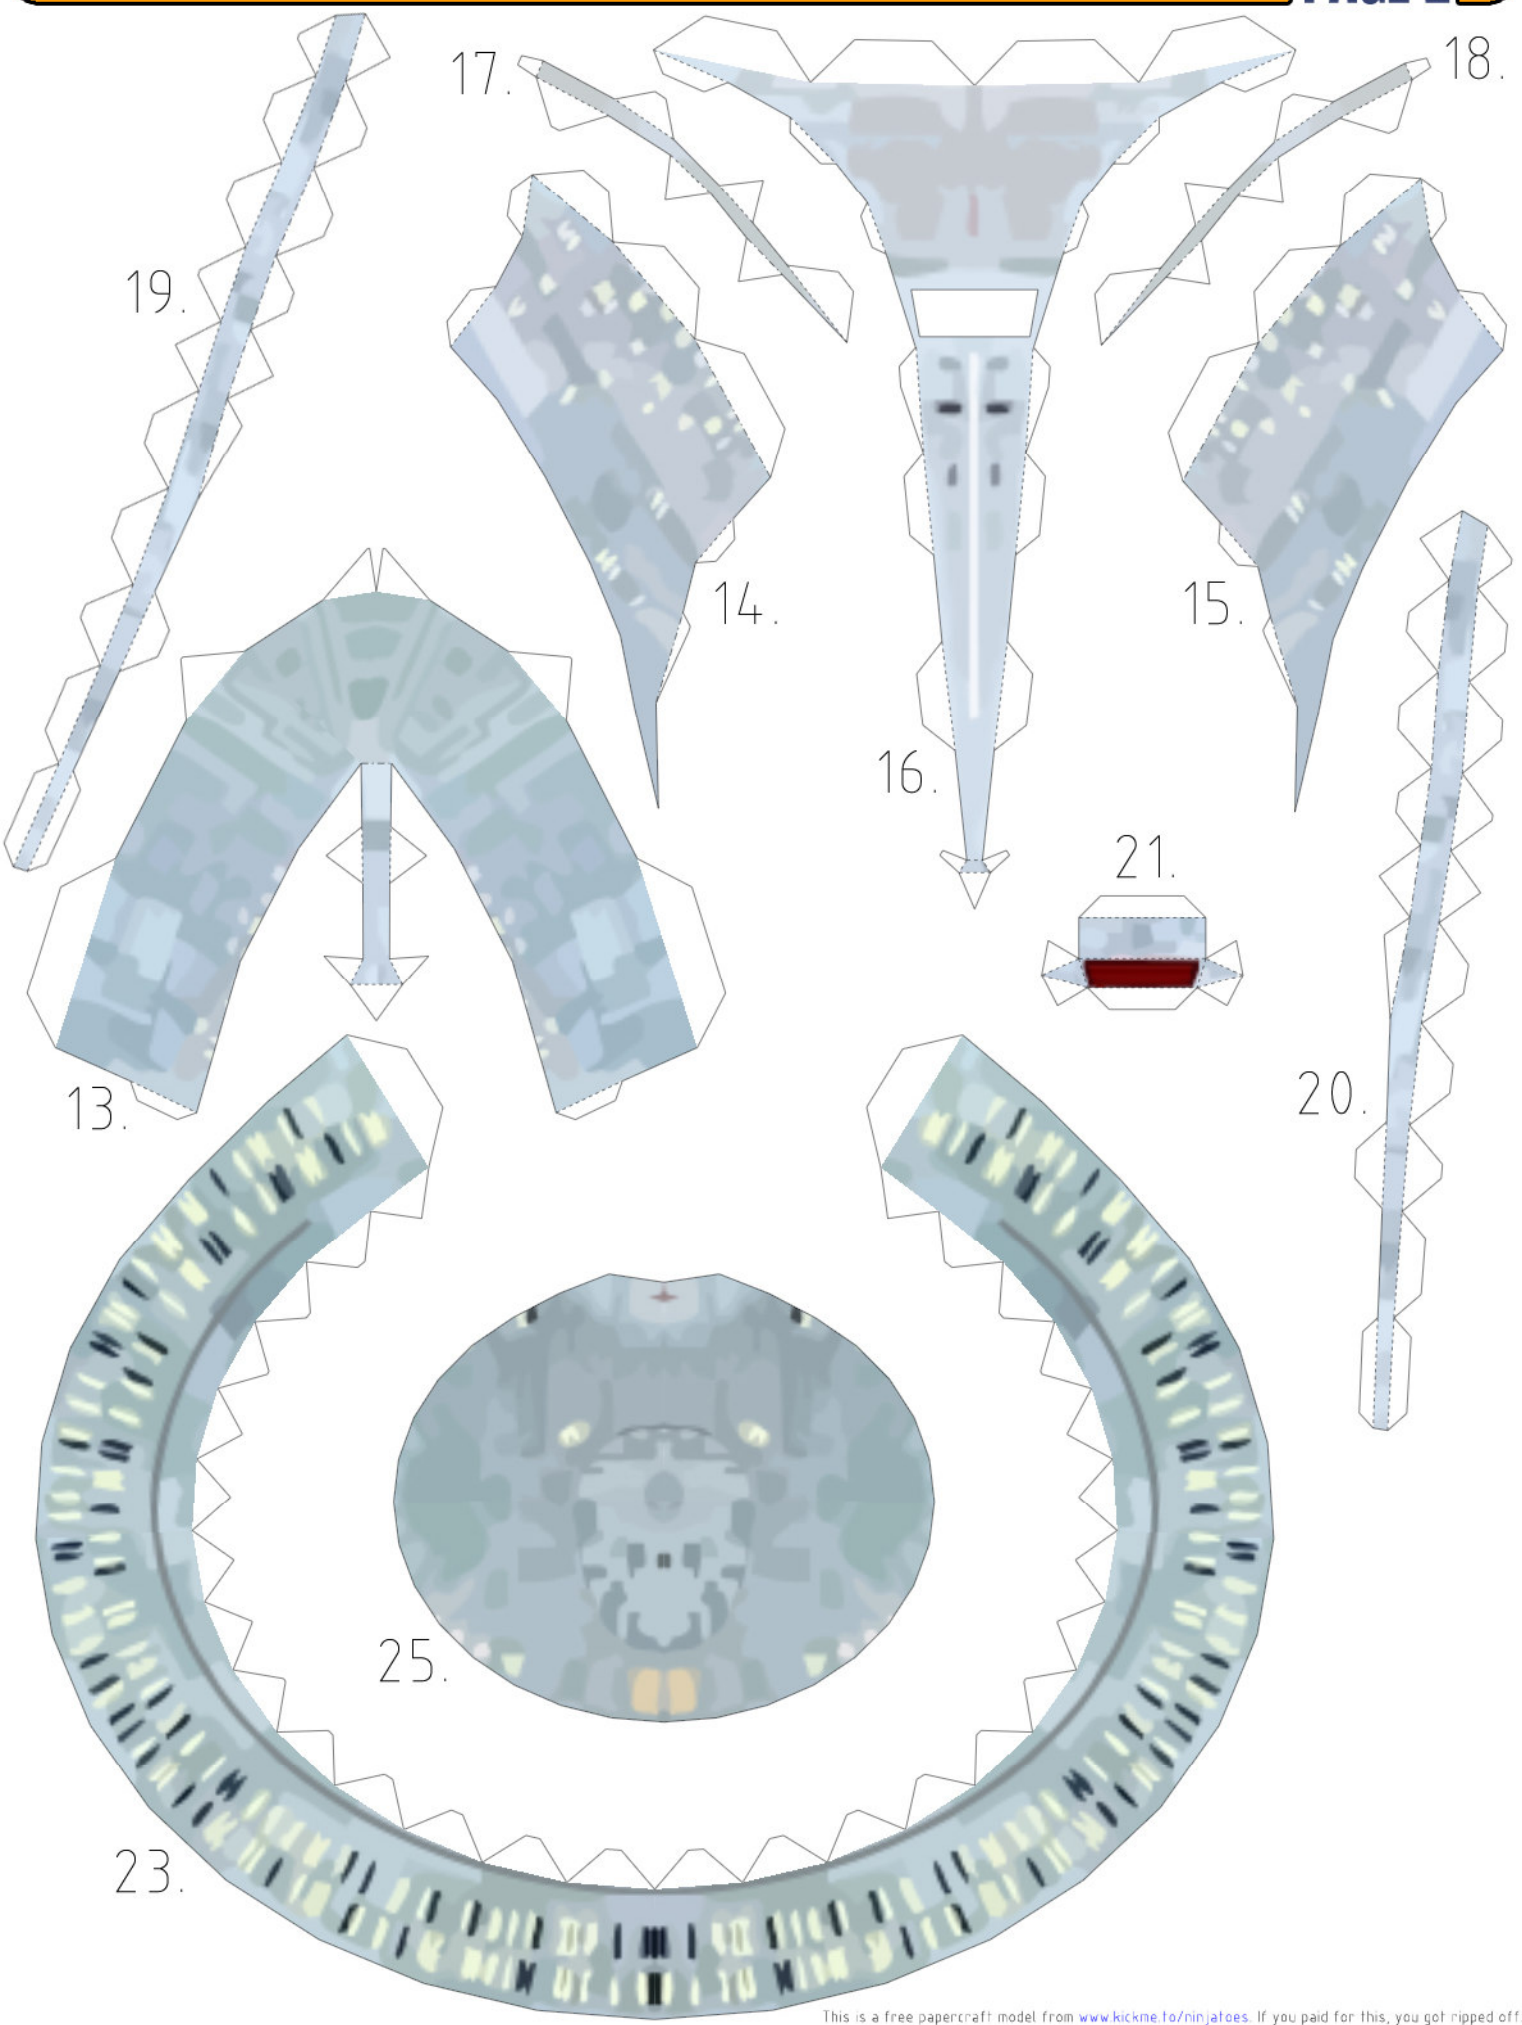

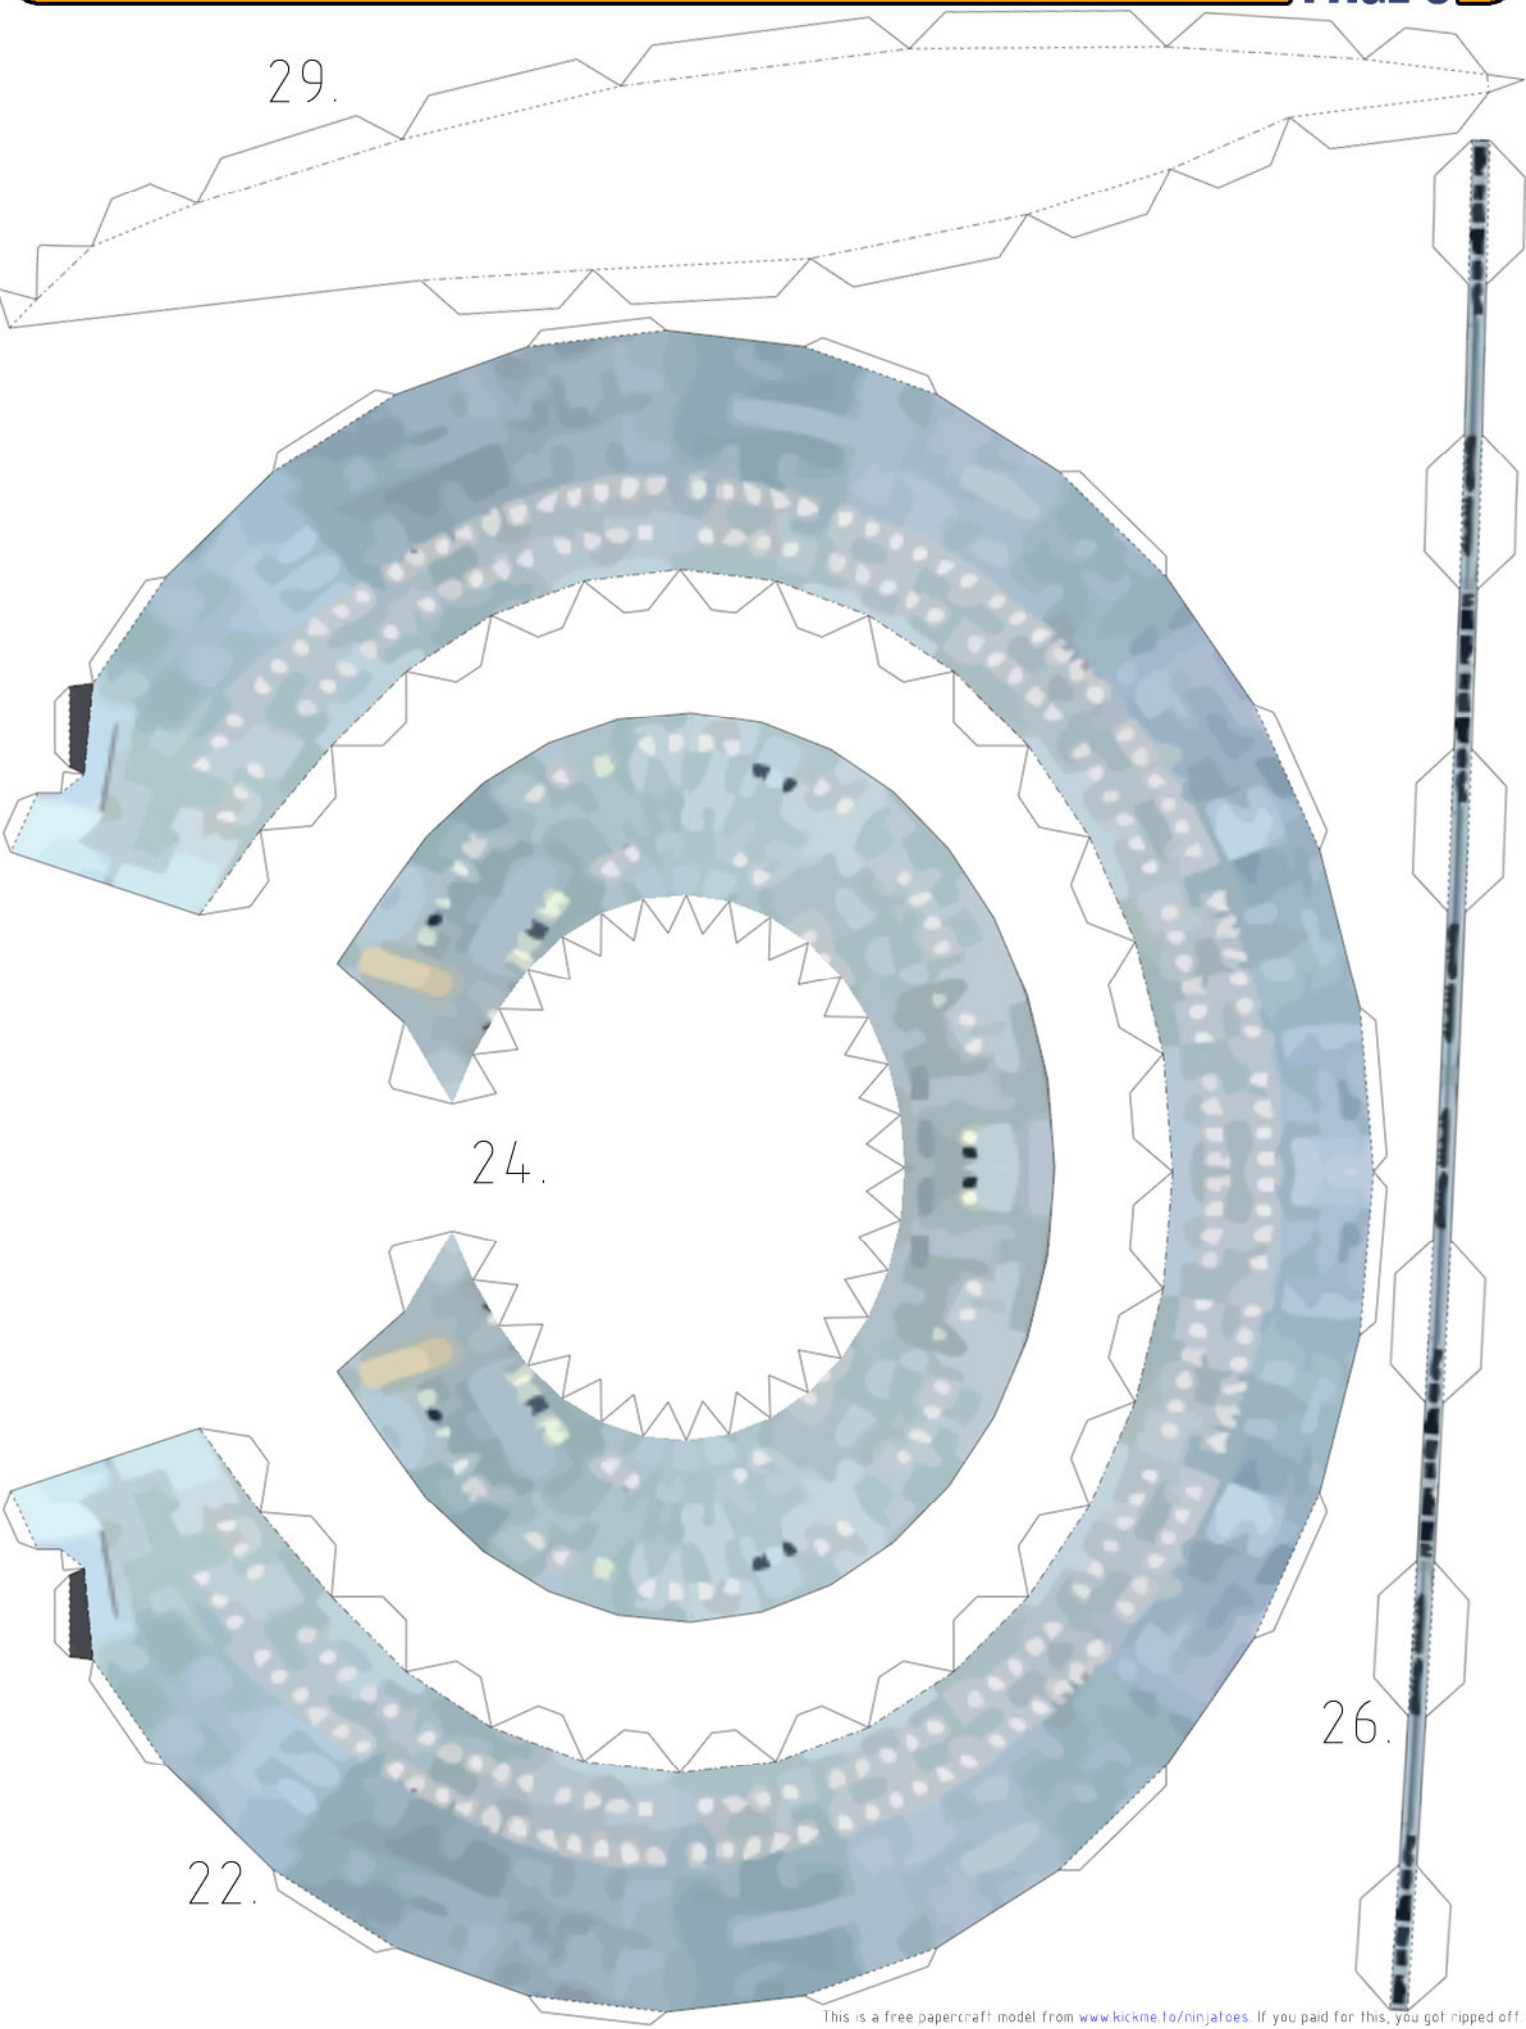

To Boldly Go

Designed as a next generation of starships, the Galaxy class incorporates Starfleet's latest advancements in warp technology and science instrumentation.

Of the six Galaxy class starships originally planned, three were eventually completed: the U.S.S. Galaxy, the U.S.S. Yamato, and a third one, commissioned on October 4th 2363 at the Utopia Planitia Fleet Yards above Mars. Under the command of Captain Jean-Luc Picard, it would be made Starfleet's new flagship, fittingly named **Enterprise**.
